USEFUL CATALOGUE INFORMATION

Paioli Sport s.r.l reserves the right to make changes both in the technical characteristics of the products and in the list prices, which are to be intended as EXCLUDED VAT and may be subject to increases during the course of the year. The technical characteristics and product specifications are to be considered approximate.

PLANNING AND GRAPHIC REALIZATION

La Paioli Sport S.r.l. thanks all the people who collaborated on this catalog.

GRAPHIC PROJECT: Eleonora Marchesi

The Clean Cap system protects the end of the pole sections from accidental damage due to misplaced alignment and cleans out the inner female joint every time you unship. Also will stop your sections sinking if dropped into the water.

Fusion is two high modulus carbons fused together as one whilst wrapped on the mandrel. The end result being ultra rigid top kits with no tip bounce, allowing the angler to hit lightning fast bites with ease.

A carbon and resin treatment providing an anti-friction finish that enables the pole to be shipped with incredible ease during wet or dry conditions. This revolutionary surface not only adds strength, but also protects the overall fishing action during hot and cold temperatures.

The first ever formulation of its kind. Exclusive to Reglass production. Nanolith provides unique characteristics of vibration, damping & high strength. The Nanolith is an exceptional molecule, it's a thousand times smaller than a single carbon wire, and creates a bond at atomic level between fibre and matrix.

Super toughened epoxy resin. Developed by Reglass. Following the success of Sun Core, we have modified the molecular structure of Sun Core and enhanced the mechanical performance of the pre-preg. The Super toughened epoxy resin formulation gives an extremely elegant and innovative black colour finish.

High Tensile carbon fibre M55 HS and Ultralight multiwall System 2 M5 classified: **Competition, All round, Carpodrome.** High Tensile 500 grade carbon fibre Black Core S.V.Er Super vibrational damping epoxy resin.

High Modulus carbon fibre M76 HM and Ultralight multiwall System 2 M7 classified: **Competition, All round, Carpodrome.** High Tensile 760 grade carbon fibre Black Core S.V.Er Super vibrational damping epoxy resin.

Very High Modulus fibres M87 HMS and Ultralight multiwall System 2 M8 classified: **Competition, All round.** High grade 870 carbon fibre Black Core S.V.Er Super vibrational damping epoxy resin.

A special resin finish that enables the pole to be shipped incredibly smoothly & quickly. It's applied from sections 5 to the 13m butt section on many of our poles.

This clever technology provides the angler with a silky smooth elastic system. A series of teflon coated inner steps prevents the elastic from making contact with the inner wall of the pole sections.

To increase the technical performances we have engaged a resin system that was used into the aerospace industry, the "Super vibrational damping epoxy resin". The vibrations damping inside the composite structures allow high reactivity products.

Very High Grade Pitch Modulus fibers M90 HGS and Ultralight multiwall System 3 M9 classified: **Competition.** Super high 1000 grade carbon fibre and P90JS Black Core S.V.Er Super vibrational damping epoxy resin.

A fine wrap of pure teflon bonded directly onto the male joints, substantially reducing carbon to carbon wear. A simple twist locks the sections in place. We are the only manufacturer in the world that has this innovative feature.

SLOT SYSTEM: Really a new system that is actioning during the fighting moment: this system is permitting us to pull the elastic in the stronger and faster way in order to have a quicker landing of the fish, even if is a real big one.

AB TIP: Ab tip system is permitting to the last kit part to become stronger, stiffer and faster. The tip hole is even bigger in order to use hollow elastic and cones. In this way tip and section B are melted inside a unique spare!

The ultimate pre-preg concept. This new resin strongly bonds the carbon fibres & provides the ultimate fishing action.

The product development team is every day searching and studying not only the quality of the carbon fibers and the different materials but even the specific resins used for impregnate the same materials : in relation to the different tackles that we want to create we find out the best quality and the particular resins that permit us to obtain a certain result, a certain action and special performance. For decrease the breakages and grant the best curve to our rods we are now able to cross the resin process, making the same one various and multiple times in order to permit to the liquid to get inside the single fibers and especially into the coupled ones !!! A very delicate process but really new that is permitting us to develop and create the most reliable fishing rods on the market.

For some fishing techniques the rod tip is not important, is quite all...simply the most important spare! Is the spare that defines the rod action and that grants the curve and the tackle performance, as during the cast as during the fight! Is not so easy to produce the last rod spares in the best way but we are now able to obtain the desired target : advanced materials, new resins and cooking process calculated grade per grade in order to obtain fishing rod where tip and spare B are finally produced in order to present the best sensitivity and a perfect rod action. It was not easy and the investment was quite big but we can finally say to have now created tips, spares B and C of the best quality that are granting the best rod performance!

All the fishing rods are composed by multiple spares: doesn't matter if they are telescopic, put-over, put-in or spigot models. We have overpassed our experience reaching a real new target: the various sections of each rod must work together and concurrently in order to obtain the ideal action as during the casting action as during the fighting moment. We have hard worked on each spare connection, making a special ultrasonic ionization that permits us to give the best regular action from the various spares of each Maver fishing rod. Another big investment in order to grant to each customer who buy a Maver rod to own a perfect tackle, a fishing rod composed by many spares that are working together in the best checked and controlled way, giving a superlative feeling to the fisherman.

MAVER CARBON 90 is our best quality and reliability solution in order to create high performance fishing tackle! High modulus carbon 90 in order to be able to create the best, lightest and high quality tackles. Our carbon and resin experience is known worldwide and is bringing us to develop perfect combinations in order to develop simply the best tackles and rods. MC90 is representing the best carbon solution of the highest grade for your fishing rods.

In order to obtain a perfect fishing tackle is very important that each step during the realization is well studied, checked and super controlled: we deeply wanted that the quality control at the end of each working process is realized and made from reliable technicians and engineers but especially must be closed thanks to computers and softwares, technologically advanced and able to check every single thing. Our informatic system is today able to grant us the best quality control in order to be sure to have perfect rods and tackles with the highest performances. You can be sure to have bought simply the best for your fishing sessions!

MAVER CARBON 50 Maver carbon 50 is our most reliable solution in order to create very strong and powerful fishing tackles : high modulus carbon 50 in order to create the best fishing rods, very powerful and strong ones. Our experience in technology and carbon materials are bringing us to understand the correct combinations for build up the specific rods in relation to the various fishing techniques!

MAVER CARBON 70 is the Maver solution in order to create strong and reliable tackles but technical in the same time. High modulus carbon 70 in order to build the best quality tackles: light, performant and reliable. Our carbon and resin experience is bringing us to create the best mix and combinations of materials in order to create perfect quality rods, going through different fishing techniques and combining materials focusing on the different fishing tackles that we want to build up.

With my greatest happiness we are going through the 2023 season, a year which will be a re-born for the whole fishing tackle sector. During all the 2022 year we wanted to bring on innovative projects in order to put in your hands the best which every angler could desire. Myself and the whole Maver staff decided to develop real important news from a technical point working on composites and fibers introducing materials never used and seen before in the fishing tackle world. Just as an example we have increased and enlarged the commercial collection as for the matchfishing as for the feeder and the method feeder range; a super development is made even in the Reactor baits range, starting from fishmeals and super quality raw materials which we wanted to build up and handle with the big support of the Maver Uk colleagues : all in order to develop the best quality products and bring them into your hands for offer simply the best performances and emotions naturally enclosed in the fishing passion.

In all the fishing techniques and fishing styles which we propose to the market i am lucky to have near myself the best colleagues and the best experts who help continuously myself in order to create the perfect products which i am super sure will bring to every angler the best satisfaction through all the fishing days !

To all yourself, my friends, my most sincer thank you!

EVANON & PACK K801

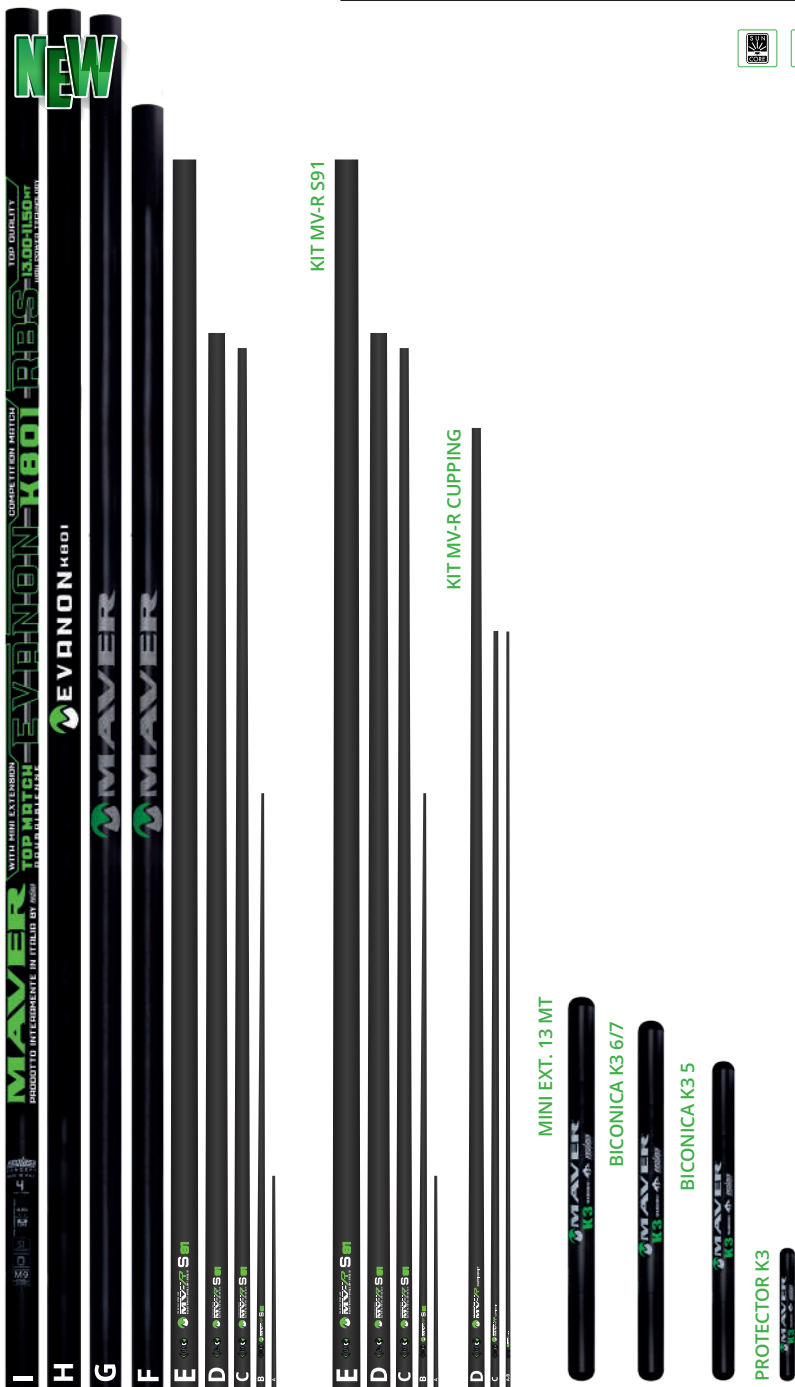

The highest pole expression you can find wherever in the market ! For the 2023 we are launching a superlative pole: extremely balanced, light and stiff: perfect for the most technical situations and for your most important competitions. Instead of its lightness it can be used even in some fishing sessions where the strength is required and asked for. With the kit S91 mounted on itself (originally) it is able to be simply the best and performing in a superbe way ! As said above, we can anyway use on this pole the kits mv-r s71 and the mv-r k41 when we need to face bigger fishes, a bit of wind or stronger lines!

X^{RBS} 995 TOP MATCH & PACK

A competition pole with 3 parallel handles which is enclosing all the features required from the most technical anglers : italian and european ones of course ! A stiff and high performance tackle which is anyway really well balanced; this is a real upgrade made from the old 99k5 wanted and studied by our engineers who decided to maintain its old but confirmed reliability ! You can simply use it wherever you want: from the rivers searching for silvers fishes, through the fisheries fighting against carps and bigger catches... it is enough to adapt on this model the correct kit in order to fit the elastics and the lines which we want to use in the specific situations!

MONSTER CARP

CODE	MT	Ø MM	TOT. CLOSED	SECTION N°	GR
8422B013	13	45	190	8 + MINI EXT	905

This roubaisienne was born for fight against really big fishes. It's great for fishing big barbels in river or win the biggest carps in lakes and fisheries. It's made with High Tensile Carbon Fibre H55 under compression system. It comes with Kit MV-R specimen perfect for the hardest battles.

NB: ALL THE MV-R KITS ARE COMPATIBLE WITH THE "SPECIMEN" SERIES, ON THE 5TH ELEMENT.

MADE IN ITALY BY:

GOLIA CARP

CODE	MT	Ø MM	TOT. CLOSED	SECTION N°	GR
8417B115	11.50	44	190	7 + MINI EXT	985

Rod for SPECIMEN fishing with two parallel handles in 11,50mt/10mt, expressly thought to be used in fishing big carps over 10 kg weight. The rod is composed with Mv-R specimen kits. For the manufacturing of the Golia Carp are used high tensile carbon fibers in H55 material, build up and in compression style.

NB: ALL THE MV-R KITS ARE COMPATIBLE WITH THE "SPECIMEN" SERIES, ON THE 5TH ELEMENT.

MADE IN ITALY BY:

GOLEM

SILURO STORIONE

8418C000	MINI EXST. POLE GOLEM 11.5 MTT
8418C001	MINI EXST. POLE GOLEM 13 MT

This rod is a SPECIMEN pole really incredible!! It's designed expressly by Reglass to subject high stresses, like fishing sturgeons or catfishes. Into carbon fibers were inserted filament of Kevlar to make the rod much stronger, every piece has got a resistance to the compression incomparable, the rod is 11,5 meters long but with possibility to arrive at 13 meters with the related original spare .

NB: ALL THE MV-R KITS ARE COMPATIBLE WITH THE "SPECIMEN" SERIES, ON THE 5TH ELEMENT.

MADE IN ITALY BY:

RENEGADE RX

CODE	MT	Ø MM	TOT. CLOSED	SECTION N°	GR
8478B900	9.00	44	185	6	777

Short 9 mt pole built thanks to the combination of resins and fibers which are making it super strong and impossible to break! In the meanwhile it is very stiff and balanced : simply the pole perfect to be used in the fisheries where we need to make a lot of weight during the summer competitions. The pole is completed with the MV-R K21 kits, the strongest through the MV-R kit range.

MADE IN ITALY BY:

8477B115	11,50	44	185	7 + MINI EXT	761

MADE IN ITALY BY:

reglass

We wanted to renew one of the best carp pole that we have created and sold from many year under the Maver brand. It is the best expression of the big fishes poles: quite big in the handle part because we wanted to make it super balanced and really handy. It is for sure the perfect pole for the anglers who wanted to start to fish with the roubaisienne style!. Also this pole is compatible with all the Mv-r pole kits. The rods is sold with the MV-R K21 kit already inside.

"DYNASTY EVO RBS 2022"

INVINCIBLE Black

The Roubaissienne Invincible Black traces the quality standards and of action of the already well known sisters made in grey suncore, with the exception of merit of being developed and produced with the even more prestigious black suncore.

KIT MV-R S&K SERIES

The Maver experts with the reglass engineers have updated the Mvr range : especially we have made a total new design on the frontal profiles even if we wanted them to fit on the 4th and 5th sections of the last seasons poles! New super resins and super quality carbon are used for produce them. The range is divided in 2 micro series: the "S" and the "K" series .

The "S" range is divided into different kits: MV-R S91, S71, S51! For these kits we have reduced the profiles of the 2nd sections and the frontal profile of the 3rd section. In this way we were able to make extremely stiff and balanced top sets. The "S91" and "S71" have got B section + A section (divided) and we built them with the reinforcement on the 3rd section in order to be personally drilled! We wanted them ready with ptfе sbush on the top in 2,3mm hole size. The "S51" has got the Ab tip with 3,3mm bush on the top and with the same reinforcement on the 3rd section (for be drilled) . The V ONE is an AB TIP with 2,6 mm top hole which can be chained with different kits as for example the MV-R S91 and the S71 ones, when we need to use hollow elastics or flat floats in the stream !

The "k" series is composed by 2 different kits: the MV-R K41 and the K21, which we wanted to sell as ready slotted kits (on the 3rd section) and with Ab tip which has already got ptfе top bush in 3,3 mm size in order to be used even with big elastics !

COMMERCIAL CARP KIT

Considering the super success of the latest commercial range, we want now to increase the technical level as the performances of these kits dedicates especially for fisheries and commercials. The design is simply beautiful too: now is born the COMMERCIAL CARP KIT XS. I kit COMMERCIAL CARP XS which are developed with 3 sections kits (tip AB+C) with total length 2,55mt , already slotted and bushed on the top with ptfe bush internal 3,6mm or 4,8mm (depending by which kit) : the slot used is the newest one which permit the "zero friction of the elastic inside the spare"

Reglass engineering is simply superb in order to permit us to create the best performances : lightness and strength combined together !! Another new feature is the signs and the numbers we are printing on the same spares which are permitting us to understand and know always the depth we are fishing ! Now you can know easy and quickly where you are fishing.....surface, medium depth or bottom.

COMMERCIAL CARP KIT MATCHLITE XS

CODE	SECTION N°	TOT. LENGHT	ELASTIC HOLLOW
8723K002	2	2.55	MAX 2.3 mm

The top of the series, indicated for fish as carass, f1, little carps and possible to be used for elastics up to 2,3mm.

COMMERCIAL CARP KIT POWERLITE XS

CODE	SECTION N°	TOT. LENGHT	ELASTIC HOLLOW
8724K002	2	2.55	MAX 2.5 mm

A sensational high quality kit realized with super quality materials which permit us to have a super strong and stiff tackle with a lightweight sensation in the hands, ideal to support elastics till 2,5 mm

COMMERCIAL CARP KIT POWER XS

CODE	SECTION N°	TOT. LENGHT	ELASTIC HOLLOW
8725K002	2	2.55	MAX 2.8 mm

The correct kit to be used where you need to catch a lot of fishes, rushing in the quickest way. It is supporting elastics till 2,8 mm and is incredibly stiff, reliable and light!

COMMERCIAL CARP KIT POWERPLUS XS

CODE	SECTION N°	TOT. LENGHT	ELASTIC HOLLOW
8726K002	2	2.55	MAX 3.1 mm

With this kit you can catch many many fishes, in the quickest time and you can win the fight even with the biggest catches without any problem! The biggest carps will be your target with zero worries. Elastic rating up to 3,1mm but we can of course use even bigger ones!

FIGHTER

The fighters sections are simply a must through the competitors accessories.

The newest FIGHTER XS are interchangeable to the original rods spares but are realized with special reinforced carbon fibers which permit us to fish in short distances avoiding the breakages of standard spares; are studied in order to be fit with the related poles elements as in the above section as in the below one : just for example if you want to fish handling the number 7 , we can use the original spares till the number 6 and use the FIGHTER XS N°7 as it was a real strong butt section . And if we need to quickly extend the length, we can fit below the section 11,5 or 13 mt !

FIGHTER 4XS - 5XS are compatible with all the poles of the latest seasons.

FIGHTER XS2 are fitting the new KYON X2 and with all the latest seasons poles (last 3 years) in 2 parallel sections , with a little tolerance.

FIGHTER XS3 are fitting the newest X995 TOP MATCH and the X991 TOP CARP plus all the latest seasons poles (3 latest seasons) with 3 parallel handles with a little tolerance.

SEAT BOX HYPERLITE

NEW

HYPERLITE SEAT BOX

HYPERLITE SEATBOX is simply the highest quality seatbox for the 2023 season. Studied deeply into the most important features and details it is built and developed mixing super materials for the frame and the 4 legs patented system. The modules are really beautiful and useful : ergonomic cushion in carbon look finishing , high quality triangle for the pole rest, fast lock personalized block and 2 levels for a perfect fitting on the ground. It is sold in 2 different compositions. One with frontal 6 cm big drawer + additional 3 cm one for fit the hooklinks + lateral 3 cm drawer under the seat.

The other different version is created with lateral big 6 cm drawer + another 3 cm one for fit hooklinks and finally lateral 3 cm one under the seat.

The 4 legs (in 36 mm diameter) are fixed ones; for every one we will have just one knob in order to rule and fix the internal telescopic part of 30 mm: using this patent we can fix the seatbox disposition till the ground level. The frame structure chained to the superlative cushion quality is making this seatbox really perfect and comfortable in every kind of situation even after long fishing sessions .

THE SEATBOX CAN BE ACCESSORIZED WITH THE RELATED MV-R AND SIGNATURE MODULES AND ACCESSORIES
